

**City of Fort Myers  
Weekly Update  
Monday, January 8, 2018**

## **South Street Environmental Testing**

### **Week of January 1, 2018**

No testing was done on the site last week.

### **Week of January 8, 2018**

No testing will be done on the site this week.

Testing is on schedule for GFA International, Inc. to deliver the initial certified groundwater and soil test results during January 2018.

### **January 2018 – Public Meeting Announcement**

The City will host a public meeting to provide information about the initial certified groundwater and soil results from testing at the South Street site. The meeting will allow the community to ask questions and provide public input. The following meeting details will be communicated to the community via direct mail, print ads, news announcements, and social media.

Thursday, January 25, 2018

5 to 7 p.m.

Dr. Carrie Robinson Event Center  
2990 Edison Ave., Fort Myers, FL

### **More About the Assessment**

The South Street environmental site assessment is a collaborative effort between the City and the FDEP.

For more information about the environmental site assessment and to view the site assessment plan, visit the City's website at [www.CityFtMyers.com](http://www.CityFtMyers.com) and scroll down to the South Street Environmental Assessment link or contact the City of Fort Myers at 239-321-7630.

The City has been communicating with FDEP and the media as certified information is provided from the experts.

When certified information becomes available, the City will provide additional communication materials to ensure that our citizens are receiving accurate information, with an explanation of what that information means to them and to their families. The City is committed to gathering all the facts from the experts, reviewing the analysis and recommendations from the experts, and then presenting an action plan to act on those recommendations.

The South Street website [www.3348SouthStreet.com](http://www.3348SouthStreet.com), launched by the City on July 24, 2017, is linked to the City website: [www.cityftmyers.com](http://www.cityftmyers.com). The site contains project documents, maps, and press releases.

The City is committed to this process and with the help of the experts, will determine if or what action is necessary. The City is relying on the experts to do the testing, and to allow the experts adequate time to analyze and finalize results.
