RE: FDEP ID: COM 288039, Weekly Update

Jon Iglehart
South District Director, FDEP
2295 Victoria Avenue, Suite 364
Fort Myers, Florida 33901

Dear Mr. Iglehart,

This letter constitutes the weekly update requested by FDEP concerning the removal of the lime residual at the South Street Property.

The August groundwater sampling was completed on Monday and Tuesday (8-20 & 21-2018). This August sampling included gross alpha. The results are anticipated to be received next week. The delay in the sampling results is due to the added gross alpha samples taken. The next testing is scheduled for Sept 17 & 18.

The City of Fort Myers City Council approved all the contracts and agreements to proceed with the removal and disposal plan submitted to FDEP on August 30, 2018. Thank you for the e-mail dated August 31 stating that the plan is consistent with interim source removal for contaminated sites identified under F.A.C. 62-780. Based on this e-mail the City of Fort Myers is moving forward with the implementation of the Removal and Disposal Plan.

The City of Fort Myers will continue to coordinate with FDEP to facilitate the Removal Plan and monitoring. Thank you for assistance over the last few months as worked out the plan.

If you have any other questions or concerns please contact me at (239) 321-7630.

Thank you,

Richard H Thompson, P.E.
