**RE: FDEP ID: COM 288039, Weekly Update**

Jon Iglehart  
South District Director, FDEP  
2295 Victoria Avenue, Suite 364  
Fort Myers, Florida 33901

Dear Mr. Iglehart,

This letter constitutes the weekly update requested by FDEP concerning the removal of the lime residual at the South Street Property.

The August groundwater sampling was completed on Monday and Tuesday (8-20 & 21-2018). This month's sampling included gross alpha. The results are anticipated to be received next week.

City staff is currently taking three ROE permissions to City Council on September 4, 2018 for approval. Additionally, City staff will be taking a contract to City Council in September to purchase one of the two properties for which we have not received a signed ROE. City staff is pursuing either buying the fifth property or obtaining a ROE.

The Lime Residuals Removal and Disposal Plan was submitted to FDEP on August 30, 2018 for your review and approval.

The submitted plan will not utilize a separate drying site.

The contracts for the site preparation, excavation plan, assurances plan and disposal with various consultants and contractors have been prepared for presentation and acceptance by the City Council at the September 4, 2018 Council Meeting. FDEP will be notified when the final contracts have been approved by the City of Fort Myers. Copies of the transportation and disposal contract will be forwarded to FDEP after they have been executed.

If you have any other questions or concerns please contact me at (239) 321-7630.

Thank you,

Richard H Thompson, P.E.
