**RE: FDEP ID: COM 288039, Weekly Update**

Jon Iglehart  
South District Director, FDEP  
2295 Victoria Avenue, Suite 364  
Fort Myers, Florida 33901

Dear Mr. Iglehart,

This letter constitutes the weekly update requested by FDEP concerning the removal of the lime residual at the South Street Property.

This week the access to the site was improved by widening the gates so that large trucks will be able to enter and exit the site in a safe manner. The tree removal continues to proceed.

During the next week the City plans to continue with the tree removal. The trees will be mulched on-site after all the trees and stumps have been removed. The mulch from the tops of the trees will be recycled and utilized for projects around the City of Fort Myers. The stumps will be disposed of at the Lee Hendry Landfill. It is anticipated that the silviculture project will take approximately three to four weeks.

In addition, the October groundwater monitoring will be collected beginning next Monday, 10-15-2018.

The City of Fort Myers will continue to coordinate with FDEP to facilitate the Removal Plan and monitoring.

If you have any other questions or concerns please contact me at (239) 321-7630.

Thank you,

Richard H Thompson, P.E.  
City of Fort Myers  
Stormwater Resource Manager
