RE: FDEP ID: COM 288039, Weekly Update

Jon Iglehart
South District Director, FDEP
2295 Victoria Avenue, Suite 364
Fort Myers, Florida 33901

Dear Mr. Iglehart,

This letter constitutes the weekly update requested by FDEP concerning the removal of the lime residual at the South Street Property.

The December groundwater monitoring samples were collected Monday 12/17/2018. The test results will be sent to FDEP when they are received.

Attached please find a weekly on-site progress report which includes the voluntary dust monitoring report done at the site.

The transportation of the lime residuals was conducted only on Wednesday 12/26/2018, this week. As of the end of day on Thursday 12/27/2018, 3,540 tons of material has been taken to Mulberry for processing and disposal.

There was no transportation of material on Friday 12/28/2018, due to the windy weather conditions. There will be no trucking from the site on Monday 12/31/2018 and Tuesday 01/01/2019 in observance of the New Years' holiday. Operations will resume on Wednesday 01/02/2019.

The City of Fort Myers will continue to coordinate with FDEP to facilitate the Removal Plan and monitoring. If you have any other questions or concerns please contact me at (239) 321-7215.

Thank you,

Richard Moulton, MBA
City of Fort Myers
