RE: FDEP ID: COM 288039, Weekly Update

Jon Iglehart
South District Director, FDEP
2295 Victoria Avenue, Suite 364
Fort Myers, Florida 33901

Dear Mr. Iglehart,

This letter constitutes the weekly update requested by FDEP concerning the removal of the lime residual at the South Street Property.

The groundwater sampling was completed on Monday 2-18-2019. Additional samples were collected on Monday 2-25-2019. The results will be forwarded to you when they are received. The next groundwater sampling will be collected on Monday 3-18-2019.

To date 28,400 tons of material has been taken to Mulberry for processing and disposal. The Confirmatory Sampling and Removal Assurance Plan sampling has been started. As part of the Assurance a final screening of the site has been done this week to assure that lime residuals have been removed. Additional material will be removed from the site early next week. City Staff and consultants are finalizing the approach to the Plan.

The City of Fort Myers will continue to coordinate with FDEP to facilitate the Removal Plan and monitoring.

If you have any other questions or concerns please contact me at (239) 321-7630.

Thank you,

Richard H Thompson, P.E.
