RE: FDEP ID: COM 288039, Weekly Update

Jon Iglehart
South District Director, FDEP
2295 Victoria Avenue, Suite 364
Fort Myers, Florida 33901

Dear Mr. Iglehart,

This letter constitutes the weekly update requested by FDEP concerning the removal of the lime residual at the South Street Property.

Groundwater samples were collected today from MW's 7, 8, 9 & 10. Additionally, surface water samples were collected from the excavations. The results will be submitted when they are received.

The City has completed its voluntary cleanup of the lime residual at the South Street property. The lake banks have been repaired to ensure that the slopes are structurally safe and sodded. The fence has been relocated. All grading and grassing on the site have been completed.

The City of Fort Myers and their consultant have coordinated with your experts to determine the protocol required for the site closure. Soil and water samples have been collected for testing as discussed with FDEP.

If you have any other questions or concerns, please contact me at (239) 321-7630.

Thank you,

Richard H Thompson, P.E.
City of Fort Myers
