RE: FDEP ID: COM 288039, Weekly Update

Jon Iglehart
South District Director, FDEP
2295 Victoria Avenue, Suite 364
Fort Myers, Florida 33901

Dear Mr. Iglehart,

This letter constitutes the weekly update requested by FDEP concerning the removal of the lime residual at the South Street Property.

Water Quality samples were collected on Wednesday, September 18, 2019. The results will be provided to FDEP when received.

The City and our consultants are preparing a response to the comments on the Site Assessment Report Amendment (SARA) and the Lime Residuals Removal Report received on September 11, 2019. The City will provide the response under separate cover.

As discussed earlier this week, since the city has completed the residual lime removal and FDEP has concurred that the soils on the site meet the Soil Cleanup Target Levels, weekly correspondence is no longer required. The city will provide updates when the water quality testing is scheduled and the results are received, in addition to any information requested for the site closure. A progress letter will be sent monthly.

If you have any other questions or concerns please contact me at (239) 321-7630.

Thank you,

Richard H Thompson, P.E.
