**RE: FDEP ID: COM 288039, Weekly Update**

Jon Iglehart  
South District Director, FDEP  
2295 Victoria Avenue, Suite 364  
Fort Myers, Florida 33901

Dear Mr. Iglehart,

This letter constitutes the weekly update requested by FDEP concerning the removal of the lime residual at the South Street Property.

The Site Assessment Report Amendment (SARA) and the Lime Residuals Removal Report were delivered to the South District Office on June 28, 2019 for your review. The City is waiting for a response.

Attached is the Groundwater and Surface Water Monitoring Report based on the water quality samples that were collected on Thursday, August 15, 2019.

The City's consultant, GFA, recommended continuing groundwater and surface water quality monitoring on a quarterly basis, in order to provide sufficient data to satisfy assessment requirements of Ch. 62-780 F.A.C. and determine the Risk Management Option and/or potential controls necessary to complete site rehabilitation. The next sampling event is scheduled to be in November of 2019, and then quarterly thereafter, as needed. Unless otherwise directed by FDEP, the City of Fort Myers will follow our consultant's recommended monitoring schedule.

If you have any other questions or concerns please contact me at (239) 321-7630.

Thank you,

Richard H Thompson, P.E.  
City of Fort Myers  
Stormwater Resource Manager
